RB 35 – Adjustable spray wash gun for Food Industry - 12 bar – 1.2 MPa

Technical manual : **E 141**

Low pressure gun suitable for pumps with rated pressure up to 12 bar – 1.2 Mpa

DN15

- **30.6200.00** RB35 w/SWIVEL G1/2 F - **A**
- **30.6250.00** RB35 w/SWIVEL G1/2 F - **B**

- Low pressure gun with body & housing in plastic material.
- Water jet width adjustable by the trigger.
 - Trigger completely drawn: pencil jet
 - Trigger released: 60° cone jet
- Plastic housing completely sealed.
- Shockproof protective rings in soft rubber.
- Inlet swivel.
- Lightweight.
- Reduced opening force.

TECHNICAL SPECIFICATIONS

P/N	BODY MATERIAL	PISTON MATERIAL	GASKET MATERIAL	MAX. FLOW		RATED PRESSURE		MAX. TEMPERATURE CONTINUOUS USE		WEIGHT		INLET
				l/min	USGpm	bar	psi	°C	°F	g	lbs	
30.6200.00	PP + GF	Brass	Viton	50	13.2	12	175	50	120	440	0.97	G 1/2" F
30.6250.00	PA + GF	Sst	EPDM	50	13.2	12	175	80	175	440	0.97	G 1/2" F

Using the gun at a water temperature higher than 60°C involves, for the operator, the use of adequate safety devices such as gloves, glasses, etc...

DIMENSIONAL DRAWING AND PRESSURE-FLOW CHART

INSTRUCTIONS

This product is to be utilized with clean fresh water, even slightly additivated with normal detergents. For use involving different or corrosive liquids, contact the PA Technical Department. Appropriate filtration should be installed when using unclean liquids. Choose the gun in line with the working data of the machine where to be installed (system rated pressure, max flow and max temperature). In any case, the pressure of the machine should not exceed the permissible pressure imprinted on the gun.

FUNCTION

The gun opens and closes a duct in pressure by means of a shutter that operates on a seat in Viton or EPDM; recovery by a spring upon trigger release.

INSTALLATION

The gun can be used also with Hot water in compliance with the technical specs. In the system that generates hot water, it is advisable to fit equipment that will limit accidental increase of the fluid temperature.

PROBLEMS AND SOLUTIONS

PROBLEMS	PROBABLE CAUSE	SOLUTIONS
Leakage from the nozzle	Presence of impurities between seat and shutter. Gun seat worn out	Clean Replace seat Fit adequate filters and/or check
Leaking seals	Seals worn out	Replace seals
Difficult trigger opening	Pressure too high inside circuit.	Control and adjust the pressure if necessary.

MAINTENANCE

STANDARD: every 400 working hours (circa 10,000 cycles), check and lubricate the seals with water resistant grease

SPECIAL: every 800 working hours (circa 20,000 cycles), check the wear of the seals and internal parts and if necessary, replace with original PA parts, taking care during installation to lubricate with water resistant grease.

Maintenance has to be carried out by specialized Technicians using only original PA spare parts.

The manufacturer is not to be considered responsabile for damage as a result from incorrect fitting and maintenance.

REGULATIONS

Read this manual before starting assembly

For a correct utilization, follow the directions described in this manual and re-print them on the Use and Maintenance manual of the machine. If needed, ask for the original Conformity Declaration for the accessory chosen.

The present manual is valid for all guns named **RB 35**.

Technical data, descriptions and illustrations are indicative and liable to modification without notice.
